Sustainable Technologies Remediation Equipment

7kW Trailer Mounted System

Single-Wing Trailer Deploys Quickly

Direct solar remediation systems operate extraction and pumping systems without grid or generator power. Varisun motor controller operates motors at various speeds during the day that match the solar production. Our systems can operate any 3 phase motor using DC power. Varisun can be used for vapor extraction, air sparging and GW pumping.

Features:

- Direct solar or Battery Base
- HMI Display
- Flow and Pressure Sensors
- Cellular Telemetry
- Programmable Schedule
- Remote Control
- Many Sensor Options

License #772329 A, C-10, HAZ, HIC
MBE, SBE, Bay Area Green Business

Possible Configurations

- 250 to 300 CFM Regen SVE
- 50 to 100 CFM Air Sparge
- 250 to 300 CFM Biosparge
- 5-7 HP Submersible Pump
- Multiple Pump Controls

Options

- Vapor Treatment Filters
- Cusom Manifolds
- 120/240 VAC Power
- Security Cameras

Systems available for sale or rent. Call today for a quote on your next project.

Sustainable Technologies Remediation Equipment

10kW Trailer Mounted System

Double-Wing Trailer Deploys Quickly

Direct solar remediation systems operate extraction and pumping systems without grid or generator power. Varisun motor controller operates motors at various speeds during the day that match the solar production. Our systems can operate any 3 phase motor using DC power. Varisun can be used for vapor extraction, air sparging and GW pumping.

Features:

- Direct solar or Battery Base
- HMI Display
- Flow and Pressure Sensors
- Cellular Telemetry
- Programmable Schedule
- Remote Control
- Many Sensor Options

Possible Configurations

- 250 to 400 CFM Regen SVE
- 50 to 150 CFM Air Sparge
- 250 to 500 CFM Biosparge
- 5- 10 HP Submersible Pump
- Multiple Pump operation
- 200 KWH energy storage trailer

Options

- Vapor Treatment Filters
- Custom Manifolds
- 120/240 VAC Power
- Security Cameras
- 200A, 480V, 3P

Systems available for sale or rent. Call today for a quote on your next project.

Sustainable Technologies Remediation Equipment

Skid-mounted System Deploys Quickly

Direct solar remediation systems operate extraction and pumping systems without grid or generator power. Varisun motor controller operates motors at various speeds during the day that match the solar production. Our systems can operate any 3 phase motor using DC power. Varisun can be used for vapor extraction, air sparging and GW pumping. The modular system can be easily expanded. The ideal size is between 3-25 HP. Each 3kW self-standing solar pod folds down and is easily transportable.

Features:

- Direct solar or Battery Base
- HMI Display
- Flow and Pressure Sensors
- Cellular Telemetry
- Programmable Schedule
- Remote Control
- Many Sensor Options
